BD-Live Ready (will be available by firmware update)

Full HD 1080/60 p & 24p True Cinema Video Output Most of all Hollywood movies are shot at 24 frames per second, and Blu-ray Disc™ movies are mastered at 24 frame per second, so it is only fitting that the Sony® Blu-ray Disc™ Players can output your films at 1080/24p for a true film-like experience at home. Of course, Sony® Blu-ray Disc™ Players can also output at 1080/60p for more traditional HDTV sets on the market. Either way Sony® has you covered for the best picture possible in Full 1080p!

Dolby® TrueHD decoder built-in Dolby TrueHD delivers lossless studio master quality audio designed specifically for high definition entertainment like Blu-ray Disc™. An incredible sound stage, dynamic range and a stellar Home Theater experience await you with Dolby TrueHD.

Dolby® TrueHD /DTS®-HD bitstream out over HDMI™ (V1.3)

DVD upscale to 1080p

Precision Cinema HD Upscale

x.v.Color™ for AVC-HD

BRAVIA™ Sync – As a leader in products with HDMI™ connectivity, Sony has created BRAVIA® Sync to gobeyond simple audio and video transmission. When combined with a select number of BRAVIA® televisions and other Sony audio and video products, in addition to audio and video transmission, control functions will be transmitted via the HDMI™ cable. With “One Touch Play,” operations that took several steps have been reduced to one. Press the PLAY button on the remote, watch the audio and/or the video component(s) turn on then the BRAVIA® television turn on and switch to the correct video input—Simple—Easy—BRAVIA® Sync.

Ether port for Network Update
