

## HP 550 Notebook PC

BASIC ELEMENTS

15.4-inch diagonal widescreen

HP recommends Windows Vista® Business

### **More than you bargained for**

A comfortable fit for any budget, the HP 550 Notebook PC helps keep you connected and productive so your office goes with you.

### **Highly portable design**

With its fresh new look and a starting weight of only 5.5 lbs /2.49 kg, the HP 550 is the perfect business partner. The 15.4-inch diagonal widescreen HP BrightView display improves the brightness, contrast and clarity of your notebook display screen providing a more vivid image similar to a plasma or LCD television display.

### **Productivity on the move**

Experience new levels of system responsiveness when running multiple applications and smarter battery performance designed to help extend mobility with Intel® Core™2 Duo Processors.<sup>2</sup> The optional DVD+/-RW SuperMulti DL LightScribe Drive<sup>3</sup> makes your storage media stand-out with custom labels that you can burn directly to your disc.

### **Stay connected**

The HP 550 helps you stay connected where you need to work by offering Wi-Fi Certified WLAN<sup>4</sup>

and integrated Bluetooth® wireless technologies. With Wi-Fi Certified WLAN, you can send and receive e-mails or access the Internet – at work, at home and at your favorite hotspots; while Bluetooth® technology provides wireless short-range communication or connectivity between other Bluetooth devices such as printers, mice and headsets.

### **Focused on your business**

The HP 550 has an array of multi-layered solutions that can help you go the distance. Device Access Manager for HP ProtectTools helps defend your network, your applications, and your data by controlling ports and removable storage devices on your system in order to prevent unauthorized users from transferring or removing your data. The HP 550 also includes an integrated Secure Digital (SD) Card reader to help boost your productivity and HP DriveGuard will aid in the reduction of shock to the hard drive. HP Fast Charge<sup>11</sup> recharges your battery up to 90% in 90 minutes, so you get back to business faster.

## HP recommends Windows Vista® Business

1. Certain Windows Vista product features require advanced or additional hardware. See <http://www.microsoft.com/windowsvista/getready/hardwarereqs.msp> and <http://www.microsoft.com/windowsvista/getready/capable.msp> for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit [www.windowsvista.com/upgradeadvisor](http://www.windowsvista.com/upgradeadvisor).
2. Dual Core is a new technology designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See [www.intel.com/info/em64t](http://www.intel.com/info/em64t) for more information.
3. Do not copy copy-right protected materials. Intended for creation and storage of your original material and other lawful uses. Double Layer discs can store more data than single layer discs. Double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. LightScribe creates a monochrome image. LightScribe media required and sold separately. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided – Version 1.0 media.
4. Wireless access point required and is not included. Availability of public wireless access points limited. Wireless Internet use requires separately purchased Internet service contract.
5. For hard drives, GB = 1 billion bytes. Actual formatted capacity is less. Up to 8 GB (for XP) and 10 GB (for Vista) of system disk is reserved for the system recovery software.
6. Shared video memory (UMA) uses part of the total system memory for video performance. System memory dedicated to video performance is not available for other use by programs.
7. Sold separately or purchased as an optional feature.
8. Operates at a maximum of 533 MHz with Celeron processor.
9. GM965 only, GL 960 has a max of 2048-MB.
10. This Windows Vista® Business licensed product will ship to you with Genuine Windows XP Professional custom installed on the hard drive. Customers buying these downgraded systems are expected to purchase at least 25 licenses annually.
11. Fast Charge technology recharges your battery up to 90% within 90 minutes when the system is off.
