

# Mio DigiWalker™ C520

Portable Widescreen GPS Navigator  
and Digital Media Player

## Mio DigiWalker™ C520

Based on a 4.3 inch screen and including a stunning array of features, the Mio DigiWalker™ C520 is putting a new face on GPS navigation. The sleek, low profile design fits easily into virtually any car interior and provides easy to follow directions to just about any location in North America. Preloaded maps, integrated Bluetooth, optional TMC, a full featured digital media player and the ability to navigate to addresses in your contact list combine to make the C520 a truly attractive and powerful addition to the Mio DigiWalker™ family.

### Go wide

One of the most striking features of the C520 is the widescreen display. More than a simple gimmick, this enhanced display includes a revolutionary "splitscreen" mode. This dual screen interface will allow you to view your progress as you travel while also providing more in depth detail on nearby points of interest, upcoming maneuvers and other important information.

Form and function join together to redefine portable navigation.

### Road show

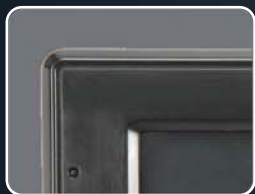

To fully take advantage of the widescreen display, the Mio DigiWalker™ C520 is also a full featured digital media player. Listen to MP3 files over standard or Bluetooth headphones or via the built in speaker, share photos with friends and family or watch movies with the included digital video player. The incredible display and high quality speaker turns the C520 into a complete entertainment system for the road.

### Make a connection

To make sure that you can keep your hands on the wheel as you go from place to place, the Mio DigiWalker™ C520 supports Bluetooth wireless technology. Simply pair your Bluetooth equipped stereo headset or cellphone with your C520 when you get in the car and you will be able to make or take calls completely handsfree as you travel. The C520 also allows you to sync with Microsoft Outlook to easily import contact lists and to navigate to any imported address.

It's where you're going.
