USB VGA External Multi Monitor Video Adapter - High Resolution

StarTech ID: USB2VGA2

Supporting higher resolutions than our USB2VGA, the USB2VGA2 USB VGA Multi Monitor External Video Adapter (high resolution) turns an available USB 2.0 port into a VGA port - providing high quality, dual display or multi-display capability that can be used in a variety of laptop or desktop applications.

Capable of running up to five additional VGA displays from a single source simultaneously (using five USB2VGA Multi Monitor External Video Adapters), USB2VGA2 connects to a host computer through a USB 2.0 port to act as an external VGA video card that can be used to extend or mirror the desktop shown on the existing display - without having to open the computer case.

Applications and Solutions

- > An excellent, lightweight solution that will allow you easy access for adding an extra monitor(s)
- > Extend your desktop across multiple monitors and run spreadsheets or browse the internet with your additional displays

Features

- > Add a secondary display adapter and extend your desktop display without taking apart your computer to install a new video card
- > No power adapter required and easy to install
- > Supports resolutions up to 1600 x 1200 (32-bit), 1920 x 1200 (16-bit)
