USB to VGA 4-in-1 Docking Station

StarTech ID: USBVGADOCK

The USBVGADOCK is a USB to VGA converter / adapter and offers the functionality of a docking station. The USB to VGA 4-in-1 docking station converts a single USB 2.0 port into multiple connection ports, including a VGA Port, 10/100 RJ45 network port, dual (3.5mm phono) audio ports and four additional USB 2.0 ports!

A stylish addition to any desktop or notebook computer, USBVGADOCK supports an impressive 1600x1200(32-bit) resolution for connected VGA Monitors, while helping to save time when swapping peripherals from one computer to another - now, instead of disconnecting devices like speakers and USB peripherals (scanners, printers, webcams etc.) in order to re-connect them to another computer, all that is required is to remove the single USB 2.0 connection, and insert it into an available USB 2.0 port on the secondary computer.

Applications and Solutions

> Perfect for any notebook user who wants a portable and desktop solution. Connect DB15, USB, Ethernet and Audio devices

Features

- > Acts as a USB 2.0 hub allowing you to connect a keyboard, mouse, printer, audio devices, and more
- > Connect to an external monitor, with resolutions up to 1600x1200

The StarTech.com

Advantage:
