

Start a Wireless Network With Up To 3X the Range and 10X the Speed!

The Wireless-N Home Router is really three devices in one box. First, there's the Wireless Access Point, which lets you connect to the network without wires. There's also a built-in 4-port full-duplex 10/100 Switch to connect your wired-Ethernet devices together. Finally, the Router function ties it all together and lets your whole network share a high-speed cable or DSL Internet connection.

The Access Point built into the Router uses the very latest wireless networking technology: Wireless-N (draft 802.11n). By overlaying the signals of multiple radios, Wireless-N's "Multiple In, Multiple Out" (MIMO) technology multiplies the effective data rate. Unlike ordinary wireless networking technologies that are confused by signal reflections, MIMO actually uses these

reflections to increase the range and reduce "dead spots" in the wireless coverage area. The robust signal travels farther, maintaining wireless connections up to 3 times farther than standard Wireless-G.

With Wireless-N, the farther away you are, the more speed advantage you get. It works great with standard Wireless-G and -B equipment, but when both ends of the wireless link are Wireless-N, the router can increase the throughput even more by using twice as much radio band, yielding speeds up to 10 times as fast as standard Wireless-G. But unlike other speed-enhanced technologies, Wireless-N can dynamically enable this double-speed mode for Wireless-N devices, while still connecting to other wireless devices at their respective fastest speeds. In congested areas, the "good neighbor" mode ensures that the Router checks for other wireless devices in the area before gobbling up the radio band.

To help protect your data and privacy, the Router can encode all wireless transmissions with industrial-strength 128-bit encryption. It can serve as your network's DHCP Server, has a powerful SPI firewall to protect your PCs against intruders and most known Internet attacks, and supports VPN pass-through. Configuration is a snap with the web browser-based configuration utility.

The incredible speed of Wireless-N makes it ideal for media-centric applications like streaming video, gaming, and Voice over IP telephony, and gives you plenty of headroom to run multiple media-intensive data streams through the network at the same time, with no degradation in performance. With the Linksys Wireless-N Home Router at the center of your home or office network, you can share a high-speed Internet connection, files, printers, and multi-player games, and run media-intensive applications at incredible speeds, without the hassle of stringing wires!

Share a high-speed Internet connection

Reach large areas of the home or office

Surf, work, or play without running wires

Wireless – N

Home Router

Features

- Internet-sharing Router and 4-port Gigabit Switch, with a built in speed and range enhanced Wireless Access Point
- MIMO technology uses multiple radios to create a robust signal that travels up to 3 times farther and reduces dead spots
- Up to 10 times faster than Wireless-G, but also works great with Wireless-G and -B devices
- Wireless signals protected by wireless encryption, and your network protected from Internet attacks by a powerful SPI firewall

Specifications

Model	WRT150N
Standards	Draft 802.11n, 802.11g, 802.11b, 802.3, 802.3u
Ports	Power, Internet, Ethernet
Buttons	Reset
LEDs	Power, Ethernet(1-4), Internet, Wireless, Security
Cabling Type	CAT 5e
Number of Antennas	2
Connector type	N/A
Detachable (y/n)	no
RF Pwr (EIRP) in dBm	17 dBm
Antenna Gain in dBi	1.8 dBm
UPnP able/cert	able
Net support	N/A
Security features	WEP, PSK, PSK2
Security key bits	128 bit

Environmental

Device Dimensions	7.40" x 1.57" x 6.93" (180 x 40 x 176 mm) W x H x D
Weight	18.60 oz. (0.527 kg)
Power	12V, 1A
Certification	FCC, CE, IC-03
Operating Temp.	0° C to 40° C (32° F to 104° F)
Storage Temp.	-20° C to 60° C (-4° F to 140° F)
Operating Humidity	10% to 85% Non-Condensing
Storage Humidity	5% to 90% Non-Condensing

Linksys products are available in more than 50 countries, supported by 12 Linksys Regional Offices throughout the world. For a complete list of local Linksys Sales and Technical Support contacts, visit our Worldwide Web Site at www.linksys.com.

Minimum Requirements

- Internet Explorer 5.5 or Firefox 1.0
- CD-ROM drive
- Windows 2000 or XP
- Network Adapter

Package Contents

- Wireless-N Home Router
- Setup CD-ROM with Norton Internet Security
- User Guide on CD-ROM
- Ethernet Network Cable
- Quick Install
- Power Adapter

Check the product package and contents for specific features supported. Specifications are subject to change without notice.
